

Abstract

A hand grinder (10), having a grinding sheet (20) that
5 fits over the grinding disk underside (18) and having
clamping means (22, 24, 30) for fixing the grinding sheet
(20) to the grinding disk (14), the clamping means (22, 24,
30) having clamping bodies (24) that can be pressed against
the ends (21) of the grinding sheet; the clamping body is
10 supported freely rotatably about an eccentric shaft (28), and
the pivot shaft (28) is located substantially vertically
above a concavely curved mounting face (22).
